

LOADING DOCK BUMPERS

Heavy Duty Loading Dock Bumpers designed, tested and engineered to withstand constant abrasion and shock providing maximum safety and high durability.

- Made out of recycled truck tyre laminates compressed under approximately 1500 pounds pressure
- Galvanised steel plates to ensure easy yet strong mounting at the dock
- Longer life and better performance due to lamination technique as compared to standard manufacturing techniques
- Available in standard as well as customizable sizes for docks having trucks with varying bed heights

APPLICATIONS

Loading docks, Warehouses, Garages, Airports or any environment involving reversing heavy vehicles. Offers protection to structure, vehicle and cargo thereby offering huge cost benefits.

STANDARD SIZES

4½"x10"x12", 4½"x10"x14", 4½"x10"x18", 4½"x10"x24"
